GAMING CHAIRS F17
CTesports F17

DESCRIPTION

The F17 is a high-end gaming chair with a super reinforced and padded structure. The support weight of 300Kg, about double compared to traditional gaming chairs, is guaranteed by the massive structure at the base (the weight of the chair is 25kg) and by the wheels with a diameter of 7cm. The various adjustments, including the complete reclining and the tilting function, and especially the double padding, make the F17 your inseparable companion for all the hours of play and rest you want.
