IMAGES	

DESCRIPTION	<p>KROM is a symmetrical gaming mouse with 11 buttons with removable magnetic side panels (buttons) and RGB and Rainbow lighting. It is available in two versions: silver (Pixart 3325 sensor with 5000 DPI hardware) and gold (Pixart sensor 12000 DPI hardware).</p> <p>The mouse has magnetic side panels, in the package there are panels without buttons and panels with 3 buttons that can be mounted in such a way as to have 3 buttons on the left (for right) or 3 buttons on the right (for left-handed) or 3 on left + 3 right or even no buttons left or right. KROM has a total of 11 software-programmable buttons, of which 2 are generally used for DPI. KROM is equipped with removable weights at the bottom. The lighting is in two independent circuits, one RGB and Rainbow running along the mouse and the other RGB illuminating the logo. The mouse has within it a programmable CPU with the software downloadable from the CTesports site with which you have access to macro and number of fixed color lighting effects, RGB and Rainbow.</p>
