CTesports LEGION MECHANICAL RGB KEYBOARD
LEGION

DESCRIPTION

The Legion is a very high-end keyboard, it's mechanical, with single RGB LEDs in 16 Million of colors. The switches are the brand new Kailh Boxes, the only ones with waterproof and dustproof IP56 certification, the only ones with 24K gold contacts, the only ones with click-bar system (soft click and same round trip). The Legion is available with white and red switches.

Here are other notable features: magnetic palm-rest, volume wheel, multimedia keys, macro keys, 2 USB on the back.

The Legion is equipped with a programmable CPU and downloading the software from the CTesports site you have access to various macro and lighting functions including every single button programmable in 16Milions of colors, numerous profiles already set and to be set. Has also stored dozens of accessible effects inside it even without software with keyboard commands on 14 keys in run-time.
